LUMEA PREISTORICĂ DIN INSULA HATEG

THE PREHISTORIC WORLD OF HATEG ISLAND

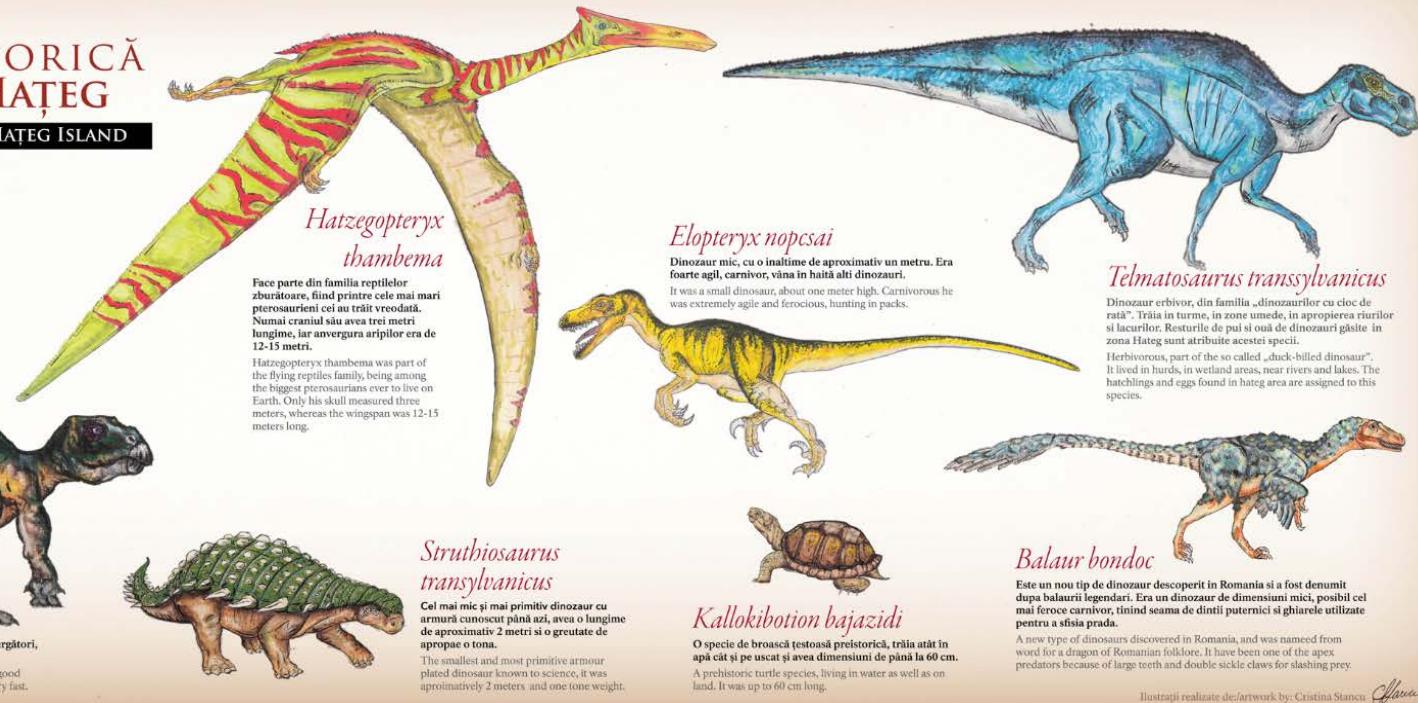

Dinozaurii din Tara Hategului, pe vremea
cand aceste locuri erau o insula tropicala
ratacita intr-o mare preistorica, acum mai
bine de 65 de milioane de ani.

The Hateg Country dinosaurs,
from the times when it
was a tropical island in a
prehistoric sea, more than
65 million years ago.

Zalmoxis sp.
Era un dinozaur erbivor ce trăia în turme. Era foarte buni alergători, adesea scăpând de prădători prin fugă.

Was a herbivorous dinosaur, lived in large herds. They were very good runners, often escaping from the predators by simply running very fast.

RESULTS

- 320 enlisted volunteers
- The volunteer work is used to develop tourism infrastructure, events, educational activities which all contribute to local welfare by creating new opportunities

Co-funded by the
Erasmus+ Programme
of the European Union

- Investing in local youth, in their training and experience, we invest in the community's future generation,

Co-funded by the
Erasmus+ Programme
of the European Union

- Raising awareness for problems like geoheritage conservation, sustainable tourism development, risk management, climate change and others on the Geopark's agenda received a boost along with the volunteer program. The young volunteers are an important vector for the key messages to get across to the community.
- The Geopark has a team member in about 300 households all over the region.
